		ion, confirmation response and scheduled quan	
	transactions		
			

Gas Industry Standards Board Request for Initiation of a GISB Standard for Electronic Business Transactions or Enhancement of an Existing GISB Standard for Electronic Business Transactions

4.	Use of Proposed Standard or Enhancement (include how the standard will be used,
	documentation on the description of the proposed standard, any existing
	documentation of the proposed standard, and required communication protocols):

Customers on Southern Natural pipeline nominate to / from master				
storage contracts that include both firm and interruptible storage rights.				
Through the use of this storage service data element, the customer				
will designate whether the nomination will be under the firm (CSS) or				
interruptible (ISS) portion of the storage contract. In addition, there				
are customers on Southern Natural and South Georgia who have				
ANR storage rights. These customers will designate either a (50-day)				
or (100 day) account when nominating to deliver gas to ANR at				
Shadyside for subsequent delivery into the ANR storage field.				

5. Description of Any Tangible or Intangible Benefits to the Use of the Proposed Standard or Enhancement:

The utilization of the master storage contract which will include both					
firm and interruptible storage rights will greatly simplify storage					
services on Southern Natural. This data element is necessary to the					
customer who needs to nominate in the CSS or ISS under the master					
storage contract. This data element is also necessary for customers					
who have ANR storage service to be able to properly nominate that					
service.					

Gas Industry Standards Board Request for Initiation of a GISB Standard for Electronic Business Transactions or Enhancement of an Existing GISB Standard for Electronic Business Transactions

6.	Estimate of Incremental Specific Costs to Implement Proposed Standard or		
	Enhanceme	ent:
