Attention: Ms. Denise Rager

**Re: R03035A**

WGQ Executive Committee:

Mirant Americas Energy Marketing (MAEM) would like to offer its support of the recommendation regarding request R03035A. Specifically, we believe that the Executive Committee should approve the proposed modification to existing standard 4.3.23 and the proposed four new standards relating to gas quality reporting. Mirant believes that the proposed reporting requirements will provide end users like us with an efficient means of determining and tracking fuel quality and will also facilitate the emissions reporting process.

Thank you for the opportunity to comment.

Sincerely,

A handwritten signature in cursive script, appearing to read "Alan Johnson".
