

March 2, 2011

Dear NAESB Executive Committee:

SBW Consulting, Inc. is a long-standing member of the energy efficiency community involved in energy efficiency program evaluation, measurement and verification throughout the United States. We have reviewed a copy of the LATE FORMAL COMMENTS of February 25, 2011, produced by the Regional EM&V Forum with input from stakeholders, including ourselves. I am writing to convey my support for the recommendation requesting deletion of WEQ.020.3.11.1.9 concerning proxy variable accuracy requirements from the NAESB Wholesale Electric Quadrants Business Practice Standards for Measurement and Verification of Energy Efficiency Products, and my concurrence with the reasons for the recommendation that were noted in the comments.

Sincerely,

Marc Schuldt President
